

## WEBWORLD- CMS Publisher

It is a BEST content management/ HTML publisher; it is one of the leading publishers in the internet market. It has many features and tools that all will help a user to make/build their web pages as much as professional and exactly they can convert their feel to page content design.

## Most Important Features of WEBWORLD Publisher

- ❖ **A cross-browser, cross-platform WYSIWYG online Rich Text Publish.**

Compatible with the most important browsers available in the market: IE 5.5+, Firefox 1.0+, Mozilla 1.3+, Netscape 7+ and Safari (1.3+). This includes Macintosh and

- ❖ **Clean, lightweight and extremely fast loading**

Numerous optimization methods have been applied. It's clean, compact, extremely fast-loading, but still powerful and efficient.

- ❖ **Compliant with the web standards, no deprecated tags such as <FONT> anymore**

Does your online Rich Text Publish still use deprecated tags such as <FONT>? Webworld Publish will help you build sites that adhere to the latest HTML standards, generates clean HTML/XHTML code with no deprecated tags

- ❖ **Insert clean HTML from Microsoft Word.**

When text is pasted from Microsoft Word a lot of unnecessary word specific markup is carried across. This can result in web pages that take an unnecessarily long time to download. The Paste from Word button solves this by removing word markup before pasting the text into your page.

- ❖ **Support accessibility according to W3C WAI and section 508 accessibility guidelines.**

Webworld Publish optional accessibility settings ensure your site complies with Section 508, so people with disabilities can have full access to your content.

- ❖ **Output HTML or well-formed XHTML to your choice**

Webworld Publish supports output well-formed XHTML. Your choice of XHTML 1.0 or HTML 4.01 output.

- ❖ **Unlimited levels of the undo/redo feature**

Many of the other Publishers on the market cannot undo or redo certain actions, and certain table operations - such as cell merge or column deletion. Webworld Publish has a new custom undo/redo implementation to make you can now safely undo those actions.

❖ **Multi-culture support, Easy localization through XML**

All labels, buttons, tooltips and messages are located in external XML files, so that the language of the Publish can be switched with a single property. You can also create a new language in a matter of minutes.

❖ **Support complete page editing (from <HTML> to </HTML>)**

Webworld Publish allows you to edit a full HTML page, including <title>, <!DOCTYPE...> and some other options. You can also insert Form elements (checkbox, button, textarea, etc.) and modify certain properties of the element.

❖ **Single line returns on enter Key press**

Most other Publishes insert double line returns which can be annoying for clients who are used to editing in Microsoft Word. WebworldPublish can be configured to use <div>, <br> or <p> tags when you press enter. In either mode <br> tags can be created by using shift+enter

❖ **Support HTML code indentation and Tags appear in lower case**

Webworld Publish displays nicely indented code in the HTML mode and the generating HTML tags and Attributes are in lower case. This is very convenient and important for the advanced users.

❖ **Full-Screen editing support**

It does not open a new window, instead it will resize to fit the browser screen. Edit in full screen mode, maximizing your available space.

❖ **Downloadable files support**

You can upload document files, create a link from your HTML content to the document files (zip files, ppt files...).

❖ **CSS-based Skinning**

Webworld Publish provides several built in themes that are ready to use. Developers can completely change the appearance of the toolbar and the dialogs by simply modifying the supplied classes and images.

❖ **Advanced table manager**

Create and modify tables and table cells. Set their border color, alignment, cellspacing and more! Once you've created a table, simply right click inside of it and use the handy popup menu to change its attributes. <caption>, <summary>, <thead>, <tfoot>, <th> tags are supported.

❖ **Image insertion and automatic upload**

Built-in thumbnail generator. Thumbnail images are dynamically created; Supports upload new images. Paging - specify how many images. Support auto resize images.

❖ **Content management with templates**

The basic idea behind a Content Management System (CMS) is to separate the management of content from design. Webworld Publish allows the site designer to easily create and establish templates to give the site a uniform look. Templates may be modified when desired.
